3. This approval does not relieve the applicant or owner of any requirement of any other governmental agency.
4. Ash Grove shall limit the injection of whole tires as waste fuel substitutes for the kiln system to fuels that are non-hazardous as defined by WAC 173-303-515, Special Requirements for Used Oil Burned for Energy Recovery, or by WAC 173-303-090, Dangerous Waste Characteristics, as appropriate.
5. Ash Grove shall limit the amount of whole tires injected as non-hazardous waste fuel substitute on a daily average, to no more than 30% by weight of the fuel consumption of the kiln system.
6. Ash Grove shall submit a Fuel Monitoring Plan for injection of whole tires within 30 days after this approval. The Plan shall contain the method for verifying compliance of Condition No. 5 and the replacement fuel composition (i.e., Btu content, % ash, etc.)
7. Ash Grove shall submit an Emission Monitoring Plan within 30 days after this approval. The Plan shall contain the following elements:
 - (a) Measurement methods, analytical procedure and testing dates for demonstrating compliance with the requirements of this Order of Approval and Order of Approval No. 5730.
 - (b) The source test methods shall include: EPA Method 5 or EPA Method 201A (particulate); EPA Method 23 (semi-volatile organic compounds); EPA Method 25A (total hydrocarbons); EPA Method 26 (chlorides, fluorides, ammonium and metals); and EPA Method TO-14 (volatile organic compounds).
 - (c) Ash Grove shall conduct the source tests within 60 days of injection of whole tires and submit results within 60 days of testing, including information verifying Condition No. 5 above.
 - (d) A verification based on actual emissions measurements that the main stack emissions do not cause a violation of the ambient air quality standards in Regulation I, Article 11, or cause ambient levels above the ASILs listed in Regulation III, Appendix A.

Approval is hereby granted as provided in Article 6 of Regulation I of the Puget Sound Air Pollution Control Agency to the applicant to install or establish the equipment, device or process described hereon at the INSTALLATION ADDRESS in accordance with the plans and specifications on file in the Engineering Division of PSAPCA.
2. Compliance with this ORDER and its conditions does not relieve the owner or operator from the responsibility of compliance with Regulations I, II or III, RCW 70.94 or any other emission control requirements, nor from the resulting liabilities and/or legal remedies for failure to comply. Section 5.05(e) of Regulation I requires that the owner or operator must develop and implement an operation and maintenance (O&M) plan to assure continuous compliance with Regulations I, II, and III.
3. This approval does not relieve the applicant or owner of any requirement of any other governmental agency.
4. This Order of Approval No. 6644, issued to allow water sprays to control dust at transfer towers #10A and #11, hereby supersedes and cancels Orders of Approval No. 2399 dated Feb 28, 1983 and No. 5696 dated Jan 11, 1995.

ASH GROVE CEMENT COMPANY (E MARG,), 3801 E MARGINAL WY S, SEATTLE, WA, 98134

THIS ORDER IS ISSUED SUBJECT TO THE FOLLOWING RESTRICTIONS AND CONDITIONS

1. Approval is hereby granted as provided in Article 6 of Regulation I of the Puget Sound Air Pollution Control Agency to the applicant to install or establish the equipment, device or process described hereon at the INSTALLATION ADDRESS in accordance with the plans and specifications on file in the Engineering Division of PSAPCA.
2. This approval does not relieve the applicant or owner of any requirement of any other governmental agency.
3. Ash Grove Cement shall comply with requirements of 40 CFR Subpart A and Subpart F, and notify the U.S. Environmental Protection Agency and PSAPCA in writing according to 40 CFR Subpart A.
4. Ash Grove Cement shall install and maintain gauges to measure the pressure drop across the two Alanco baghouse exhaust filters. Within 90 days after beginning operations, the acceptable ranges for the gauges shall be clearly marked on or nearby the gauges.
5. Once during each shift either Alanco baghouse is used, Ash Grove Cement shall determine and record if the pressure drop across the exhaust filters is in the acceptable range.
6. If the pressure drop across the exhaust filters of either Alanco baghouse is not within the acceptable range, Ash Grove Cement shall take corrective action as specified in the facility's Operation and Maintenance Plan.
7. The PM-10 emissions from each of the Alanco baghouses shall not exceed 0.005 grains/dscf over a twenty-four hour period. Ash Grove may demonstrate compliance with this condition by any of the following:
 - (a) By performing a PSAPCA-approved source test according to EPA Method 5 or EPA Method 201A;
 - (b) By demonstrating no visible emissions for 15 consecutive seconds;
 - (c) By demonstrating no visible emissions for 3 consecutive minutes; or
 - (d) By repairing within 24 hours any baghouse that has visible emissions for more than three consecutive minutes. Compliance shall be determined for visible emissions using EPA Method 22. PSAPCA may require a source test for any baghouse that has sustained visible emissions, unless such emissions are unavoidable under WAC 173-400-107.

OWNER

Ash Grove Cement Company (E Marg.)
3801 E Marginal Wy S
Seattle, WA 98134-1113

INSTALLATION ADDRESS

Ash Grove Cement Company (E Marg.), 3801 E Marginal Wy S, Seattle, WA, 98134

THIS ORDER IS ISSUED SUBJECT TO THE FOLLOWING RESTRICTIONS AND CONDITIONS

1. Approval is hereby granted as provided in Article 6 of Regulation I of the Puget Sound Clean Air Agency to the applicant to install or establish the equipment, device or process described hereon at the INSTALLATION ADDRESS in accordance with the plans and specifications on file in the Engineering Division of the Puget Sound Clean Air Agency.
2. This approval does not relieve the applicant or owner of any requirement of any other governmental agency.
3. This source is subject to Subpart A and F of 40 CFR Part 60.
4. PM-10 emissions from each baghouse, except the main stack baghouse, shall not exceed 0.005 grains/dscf over a 24-hour period. Ash Grove may demonstrate compliance with this condition by any of the following:
 - (a) Performing a Puget Sound Clean Air Agency-approved source test according to EPA Method 5 or EPA Method 201A;
 - (b) Demonstrating no visible emissions for 15 consecutive seconds;
 - (c) Demonstrating no visible emissions for three consecutive minutes; or
 - (d) Repairing within 24 hours, any baghouse that has visible emissions for more than three consecutive minutes.

Compliance shall be determined for visible emissions using EPA Method 22. The Puget Sound Clean Air Agency may require a source test for any baghouse that has sustained visible emissions, unless such emissions are unavoidable under WAC 173-400-107.

5. Except during startup and shutdown of the kiln, scheduled maintenance and for emissions considered unavoidable under WAC 173-400-107, emissions from the main baghouse shall not exceed the most stringent of PSD limits or the following limits:

Order of Approval for NC No. 7381

JUN 6 2001

- (a) Carbon monoxide (CO) emissions shall not exceed 1049 ppm (parts per million) corrected to 10% oxygen (O₂) for an 8-hour average, and CO shall not exceed 2353 tons per year;
- (b) Nitrogen oxides (NO_x) emissions shall not exceed 650 ppm corrected to 10% O₂ as a 24-hour rolling average, and NO_x emissions shall not exceed 1846 tons as a 12-month running total; and if the NO_x emissions exceed 1400 tons as a 12-month running total, Ash Grove shall notify the Puget Sound Clean Air Agency (Attn. Permit Certification) describing actions that will be implemented to assure compliance with the annual NO_x limit.

(c) Sulfur dioxide (SO₂) emissions shall not exceed 180 ppm corrected to 10% O₂ for a one-hr average, and 176 tpy;

(d) Particulate matter (PM) emissions shall not exceed 10.6 pounds per hour, and 46 tpy.

6. During startup and shutdown of the kiln, and during scheduled maintenance on the main baghouse as defined in Appendix A to this approval, all of the emission limits stated in Condition No. 5 apply, except that emissions from the main baghouse shall not exceed the following limits.

(a) During the kiln startup-preheating period prior to kiln feed introduction, the SO₂ emission limit for the main baghouse shall consist of compliance with the following work practices and fuel restrictions:

(i) Only natural gas shall be used as fuel and Appendix A to this approval shall be followed for heating a cold or warm kiln system and system conditioning after maintenance, and

(ii) Sulfur rings shall be removed from the kiln prior to startup, if sulfur ring formation had required the kiln to be shut down.

(b) During the kiln startup-feed introduction period, SO₂ emissions from the main baghouse shall not exceed 200 ppm corrected to 10% O₂ for a one-hr average.

(c) Any shutdown of the kiln shall follow the normal rotation and cool down procedures in Appendix A to this approval for the removal of as much material from the kiln as possible without damaging system components.

(d) Ash Grove shall log as part of the Operations and Maintenance Plan and report to the Puget Sound Clean Air Agency as part of the monthly Continuous Emission Monitoring Report:

(i) The date, start and end times, and the fuel used for kiln startup-preheating periods prior to feed introduction;

(ii) The sulfur ring removal from the kiln, if the ring formation required the kiln to be shut down;

(iii) The date, start and end times for kiln startup-feed introduction periods; and

(iv) The cause for kiln shut down, the duration of kiln cool down and the kiln rotation schedule in kiln cool down.

7. Ash Grove shall monitor and report CO, NO_x, SO₂, and opacity emissions from the main baghouse according to Article 12 of Regulation I. SO₂ emissions from the main stack shall be monitored at all times following the introduction of feed to the kiln.

8. This Order of Approval No. 7381, issued to modify the cement kiln NO_x emission standard, supersedes and cancels Orders of Approval No. 3382 dated Jun 19, 1990, No. 5730 dated Dec 29, 1994, and No. 7381 dated Jun 29, 1998.

Ash Grove Cement Co, E Marginal, 3801 E Marginal Way S, Seattle, WA, 98134-1113

THIS ORDER IS ISSUED SUBJECT TO THE FOLLOWING RESTRICTIONS AND CONDITIONS

1. Approval is hereby granted as provided in Article 6 of Regulation I of the Puget Sound Clean Air Agency to the applicant to install or establish the equipment, device or process described hereon at the INSTALLATION ADDRESS in accordance with the plans and specifications on file in the Engineering Division of the Puget Sound Clean Air Agency.
2. This approval does not relieve the applicant or owner of any requirement of any other governmental agency.

BURN NON-HAZARDOUS USED OIL

3. Ash Grove shall limit used oil to non-hazardous as defined by WAC 173-303-515, Special Requirements for Used Oil Burned for Energy Recovery, or by WAC 173-303-090, Dangerous Waste Characteristics. Ash Grove is authorized to burn used oils meeting the material specifications in Condition No. 5 of this order.

4. Ash Grove shall limit the total amount of used oil injected into the kiln to 8640 gal/calendar day. Ash Grove shall monitor and maintain daily records of the volume of used oil injected into the kiln. Ash Grove shall submit these records on a monthly basis with the required CEMS reports. Examples of used oil include:

- (a) Used oils;
- (b) Refined oil tank bottoms;
- (c) Raw crude tank bottoms;
- (d) Heavy vacuum gas oil waste;
- (e) Off specification fuel oil.

5. Ash Grove shall only burn used oils meeting the following limits as delivered:

Order of Approval for NC No. 9229

MAY 17 2007

- (a) As less than or equal to 5 ppm;
- (b) Cd less than or equal to 2 ppm;
- (c) Cr less than or equal to 10 ppm;
- (d) Pb less than or equal to 100 ppm;
- (e) PCB less than or equal to 50 ppm;
- (f) Total Halogens less than 1000 ppm;
- (g) Flash Point greater than or equal to 100 F;
- (h) Heat content between 5,000 Btu/lb to 19,000 Btu/lb.

USED OIL DELIVERIES

6. Ash Grove shall:

- (a) Authorize the person receiving and reviewing used oil shipments the authority to reject materials exceeding standards of this approval.
- (b) Obtain a signed laboratory report from the oil supplier verifying each shipment of used oil received meets Conditions No. 5(a) through (h).
- (c) Maintain a used oil delivery log and record in this log the name of the supplier, the delivery date, the volume of used oil and a signed laboratory report of each shipment of used oil received.

7. Ash Grove shall calibrate the used oil flow meter at least once per calendar year and maintain records of that calibration.

SOURCE TEST

8. Ash Grove shall submit a source test plan for Condition No. 9(a) through 9(h) no later than 30 days after the completion date specified in the Notice of Completion for this Order, meeting Regulation I, Section 3.07 with sampling methods, analytical procedure and testing dates. Ash Grove shall also follow 40 CFR 63, Subpart A and Subpart LLL for Condition No. 9(h) (Dioxin/Furan) including determining the average inlet temperature of the particulate matter control device. Alternative test methods to those identified in Condition No.9 may be used only after review and approval by the Agency.

9. Ash Grove shall complete performance source testing while operating with and without the injection of used oil. These tests shall be conducted while burning coal but not injecting tires and with the raw mill both operating and not operating. All tests shall be performed no later than 90 days after the completion date specified in the Notice of Completion with the following methods:

- (a) Opacity (CEMS);
- (b) SO₂ (CEMS);

Order of Approval for NC No. 9229

MAY 17 2007

- (c) NO_x (CEMS);
- (d) CO (CEMS);
- (e) Formaldehyde (Method 0011/SW-8315);
- (f) HCl (EPA Method 26A)
- (g) Metals (EPA Method 29);
- (h) Dioxin/Furan (EPA Method 23).

10. During the tests required in Condition No. 9, Ash Grove shall record the following data:

- (a). Main Baghouse inlet temperature following 40 CFR 63.1349(b)(3);
- (b) Type and quantity of clinker manufactured for cement;
- (c) Type and quantity of raw materials added to kiln;
- (d) Type, quantity and fuel Btu added to the kiln (including used oil);
- (e) Burnability Index; and
- (f) Variability of raw mix.

RECORDS

11. Ash Grove shall maintain written records required by this Order of Approval on site. In addition, Ash Grove shall retain each record for at least five years and make them available to Puget Sound Clean Air Agency personnel upon request.

ORDER OF APPROVAL 5687 SUPERSEDED

12. Order of Approval 9229 cancels and supersedes Order of Approval No. 5687 dated January 11, 1995.

APPEAL RIGHTS

Pursuant to Puget Sound Clean Air Agency's Regulation I, Section 3.17 and RCW 43.21B.310, this Order may be appealed to the Pollution Control Hearings Board (PCHB). To appeal to the PCHB, a written notice of appeal must be filed with the PCHB and a copy served upon Puget Sound Clean Air Agency within 30 days of the date the applicant receives this Order.
